McGraw Hill — Edition 15e — Sample PDF (2 pages)

This PDF is a PLACEHOLDER sample created for the MED platform to demonstrate per-question citation (book / chapter / page). It contains NO copyrighted text or figures from the original textbook. Replace it with your licensed file via Admin → Competitive References → Choose PDF, or keep the publisher link only.

About this sample

This page demonstrates how the platform links a micro-lesson to an exact page.

Every exam-style question stores TWO references (Persian + English) — code, chapter, page — and the student viewer opens the PDF at #page=N via iframe or the publisher site.

Admins can upload/replace the PDF without touching code: `/api/upload/pdf` (multipart, field pdf).

Workflow:

- 1) Admin → Competitive References → Edit book → Choose PDF (or paste `/pdfs/... /uploads/...`).
- 2) Admin → Learn Cards → Edit question → pick Reference (FA) + Reference (EN) + chapters/pages.
- 3) Student answers → Micro-lesson shows two 'View in reference' buttons (FA / EN) with #page.
- 4) Library shelf and Reference Viewer embed the PDF when pdf_url is present, otherwise show only cover + publisher link (rights-safe metadata_only).

Rights: keep metadata_only and upload only open-access or licensed PDFs.

To test page-aware linking, open this PDF as `/pdfs/xxx.pdf#page=2` in the viewer.

Tip: #page parameter works in most modern PDF viewers (Chrome/Edge/Firefox).

Generated by MED — replace this placeholder with your licensed content when ready.
